**Mvc Web Development Expert**

## Profile

As of May 2022, he holds the position of Information Technology Specialist at Ankara University. During this period, he has contributed to the development and support of projects such as the Student Affairs Automation and Modules, Personnel and Application System, and University Web Service Automations. Between 2010 and 2022, he served as a Computer Technician (Engineer) at Çankırı Karatekin University. During this period, he made significant contributions to the development of automations such as the Student Affairs Program, LDAP Management System, Bologna Information System, and Foreign Student Application and Examination Automation. He is experienced in identifying issues that may arise in live software automations with 100,000 users and providing effective solutions during crises. In addition to technologies like SOAP, WCF, Web API, ASP.NET, C#, and Core Net, he is also an expert in MSSQL and server-side IIS and Nginx configurations. In frontend development, he has completed projects using frameworks like ANGULAR, JQUERY, and BOOTSTRAP. Moreover, he has worked as a software team manager, ensuring coordination with tools like TFS, SVN, GITLAB, JIRA, and Trello, and can prepare documentation related to the content he develops. With the ability to create platform-independent solutions using Flutter and Dart in mobile app development, he is experienced in project management and analysis during business development processes and has played key roles within teams.

## Work Experience

- May 2022- Present  
Ankara University, Ankara (Türkiye)  
**IT Specialist (Software Development Specialist)**  
He has experience in developing and managing projects such as the Student Affairs Information System, Application System, Diploma Module, and API Service. Technologically, he successfully implements projects using technologies like microservices architecture, .NET Core (C#), Angular, and SQL/Microsoft SQL Server. Additionally, he possesses skills in project management, continuous integration and deployment (CI/CD), data analysis, business analysis, and communication.
- 2010 - 2022  
Çankırı Karatekin University, Çankırı (Türkiye)  
**Computer Technician (Engineer)**  
He has worked on projects such as the Student Affairs Information System, LDAP User Management System, Bologna Information Course Management System, and API Service. Technologically, he has managed projects using technologies such as .NET Core (C#), SQL/Microsoft SQL Server, Angular, and RESTful APIs. Additionally, he possesses skills in project management, continuous integration and deployment (CI/CD), data analysis, and communication.
- 2006 - 2009  
Bohem Advertising Agency (Yenimeram), Konya (Türkiye)  
**Graphic Designer / Software Developer**  
He has utilized his skills in poster, banner, and flyer design to create visual designs. He uses Adobe Photoshop for graphic design and image editing and prefers Adobe Illustrator for vector-based designs. Additionally, he has experience in managing small websites, with examples like Wordpress and Opencart.
